

ONBOARDING

The three flash cards

What a parent sees in the first fifteen seconds. Each card carries one promise and one illustration — no feature lists, no permissions, no account yet.

Know they're safe, always

Real-time location and gentle check-ins, so you always know your child is okay — without hovering.

See their world, gently

A friendly view of screen time and app activity, so you can guide instead of guess.

Set limits, together

Build routines like School or Lunch that keep working even offline.

Artwork is original vector work, drawn from one shared module — the same source renders these cards in the app, the hero on the flyer and the illustrations in the brochure, so the family never looks slightly different in two places.
